

WIRE EDM - MV2400-S

We bought our first Mitsubishi machine, a MV2400-S wire EDM in 2014.

It has been a fantastic addition to the other 5 EDM from another brand.

This machine has exceeded our expectations for many reasons. Our molds often require more than 600 automatic threading. The 20 Sec threading cycle time along with its amazing reliability of auto- threading, and more importantly, of the re-threading in case of wire breakage has been the greatest improvement in our operation. Our unattended machining for overnight job completion is amazing.

The maintenance is very simple and takes a minimum amount time. Mitsubishi and WSM have been excellent partners to drive this change to total success.
